March 22, 2013

Dear Valued Customers:

Bel Fuse Inc announced in November the signing of a definitive agreement with TE Connectivity to acquire the TE Transpower Coil Wound Magnetics (hereafter known as TE) business. The close date of the business is set for March 29, 2013. Bel is excited about the expanded opportunities and we want to communicate to you some of the details and changes you can expect while also outlining the necessary actions that will need to take place to assure a smooth transition of the business and backlog relative to your orders with TE for the products involved.

Transition Effects

First we want to address several key areas that we know may be of concern to you and alleviate any fears you may have associated with them:

1. The factory being acquired will continue to operate with no changes to the existing factory management group and will continue to run on their SAP ERP system.
2. The new company will honor all current POs and PO contract terms, including price, freight terms and payment terms.
3. The part numbers will remain the same without changes to materials or manufacturing processes. But, you and your partners will need to change the vendor associated with them (as outlined below).
4. Parts will continue to be marked as they currently are, any future changes to the part marking will be communicated through a PCN process. The TRP name will gradually replace the TE marking.
5. Existing MRP order schedules will be managed through the transition to maintain previously established acknowledged order ship dates.

New Vendor Code

Bel has established new entities for this acquisition. There will be multiple steps for a smooth transition of the business but the first step will be for you and your manufacturing partners to establish this new entity as an approved supplier on your systems. This action should be taken as soon as possible. The new vendor information is below:

TRP CONNECTOR B.V. (on behalf of TRP INTERNATIONAL)

c/o TRP Connector Ltd.
