Description

The Littelfuse MBR2060CT Schottky Barrier Rectifier is designed to comply with the general requirements of commercial applications for high temperature environments with low leakage and low VF parameters.

It is suitable for high frequency switching mode power supply applications with high inductive loads. This Schottky Barrier diode pair can be used as free-wheeling or flyback diodes to suppress abrupt changes across an inductive load.

Features

- High junction temperature capability
- Low forward voltage drop
- High frequency operation
- Common cathode configuration in TO-220AB package

Applications

- Switching mode power supply
- Free-wheeling diodes (also known as snubber diodes)
- DC/DC converters
- Polarity protection diodes
